

## Chris Lowder

---

CONTACT	Southwest Research Institute 1050 Walnut Street Boulder, Colorado 80302, United States	<i>Office:</i> +1 303 546 9670 <i>Mobile:</i> +1 720 808 2847 <i>E-mail:</i> lowder@boulder.swri.edu
EDUCATION	<b>Montana State University</b> , Bozeman, Montana, United States PhD Physics, June 2015 M.S. Physics, May 2011  <b>Georgia Institute of Technology</b> , Atlanta, Georgia, United States B.S., Physics, December 2007	
TEACHING EXPERIENCE	<b>University of Colorado Boulder</b> <b>Astrophysical and Planetary Sciences</b> <i>Instructor</i>	Boulder, Colorado, United States  <b>January 2020 to May 2020</b> <ul style="list-style-type: none"><li>• Designed and taught Introduction to the Solar System course</li><li>• Integrated planetarium and observatory sessions into course material</li><li>• Utilized a Learning Assistant to assist in classroom activities, and to provide an undergraduate student with an active teaching experience</li></ul> <b>Georgia Institute of Technology</b> <b>School of Physics</b> <i>Physics I / II Graduate Teaching Assistant</i>
		Atlanta, Georgia, United States  <b>August 2008 to May 2009</b> <ul style="list-style-type: none"><li>• Designed and marked problem sets covering mechanics and electromagnetism</li><li>• Engaged students in problem solving methods not directly addressed in lecture</li></ul> <b>Georgia Southern University</b> <b>Department of Physics</b> <i>Physics I / II Lab Teaching Assistant</i>
		Statesboro, Georgia, United States  <b>May 2008 to July 2008</b> <ul style="list-style-type: none"><li>• Maintained lab equipment and helped to integrate the lecture and lab experience</li><li>• Graded work assignments and assisted with in-class assignments</li></ul> <i>Astronomy Laboratory Instructor</i> <b>January 2008 to May 2008</b> <ul style="list-style-type: none"><li>• Engaged students in aspects of theory and observations in astronomy</li><li>• Modernized course content and implemented new observational activities</li></ul> <i>Planetarium Lecturer</i> <b>January 2008 to May 2008</b> <ul style="list-style-type: none"><li>• Provided free planetarium shows to grade school level groups</li><li>• Organized workshop sessions to train grade-school earth science teachers</li></ul> <b>Georgia Institute of Technology</b> <b>School of Physics</b> <i>Physics II Laboratory Teaching Assistant</i>
		Atlanta, Georgia, United States  <b>September 2007 to December 2007</b> <ul style="list-style-type: none"><li>• Setup and conducted a physics II lab session</li><li>• Instructed students and graded the resulting labwork</li></ul>

	<i>Proficient</i> : Python (NumPy, SciPy, SunPy), Perl (PDL), MayaVi / VTK, Blender, IDL, SolarSoft, L <sup>A</sup> T <sub>E</sub> X, OpenMPI, Fortran, Git/GitHub <i>Familiar</i> : C, C++, Octave, MATLAB, OpenCL, VisIt, Glue, Pandas Experience in parallel high performance computing projects and large-scale datasets	
RESEARCH EXPERIENCE	<b>Southwest Research Institute</b> <b>Planetary Science Directorate</b> <b>Department of Space Studies</b>	
	Boulder, Colorado, United States	
	<i>Research Scientist</i>	
	<b>December 2017 to Present</b>	
	<ul style="list-style-type: none"> <li>Working with Craig DeForest and Derek Lamb on Fluxon MHD modeling of the solar corona.</li> <li>Assisting with integration of codes through the Fluxon Rapid Assimilative Now-caster (FRAN).</li> </ul>	
	<b>Durham University</b> <b>Department of Mathematical Sciences</b>	
	Durham, United Kingdom	

*Postdoctoral Research Associate* **August 2015 to September 2017**

- Working with Anthony Yeates on modeling solar flux rope eruption.
- Developed the Flux Rope Detection and Observation (FRoDO) code for automated tracking of magnetic flux ropes.
- Utilized global non-potential models of the solar magnetic field, to identify and characterize magnetic flux ropes throughout the span of the solar activity cycle.
- Developed software routines for managing and visualizing large datasets.
- Organized UKMHD 2017 meeting in Durham.

**Montana State University**  
**School of Physics**

Bozeman, Montana, United States

*Graduate Research Assistant* **August 2009 to August 2015**

- Worked with Dr. Jiong Qiu and Dr. Robert Leamon in analyzing coronal dimming
- Designed automated code to detect and characterize coronal holes from SDO and STEREO EUV data to constrain global models of open magnetic field
- Developed flux transport model to study evolution of far-side open magnetic field
- Designed and supervised two projects for undergraduate research students as a part of the MSU solar REU program

**Montana State University**  
**Solar Physics Group**

Bozeman, Montana, United States

*NSF Summer REU Undergraduate Researcher* **June 2007 to August 2007**

- Improved methods to resolve the 180-degree ambiguity in solar vector magnetograms
- Attempted to apply method to high resolution Hinode magnetograms

**University of Hawaii**  
**Institute for Astronomy**

Honolulu, Hawaii, United States

*NSF Summer REU Undergraduate Researcher* **May 2006 to August 2006**

- Analysis of CMEs utilizing SOHO data for Dr. Shadia Habbal and Dr. Huw Morgan
- Observational experience and interaction with astronomers at Mauna Kea observatories on the IRTF, Caltech CSO, and the UH 88"

PROFESSIONAL MEMBERSHIPS American Astronomical Society (AAS)  
Solar Physics Division (SPD)

HONORS Living with a Star Heliophysics Summer School (Summer 2015)  
Triennial Earth-Sun Summit Student Travel Grant (2015)  
Living with a Star Portland Meeting - Best Student Poster (2014)  
SPD Studentship Travel Award (2012)  
National Merit Scholar (2004)  
Georgia Governor's Scholar (2002)  
Georgia Institute of Technology

- Faculty Honors (Fall 2004, Spring and Fall 2006)
- Dean's List (Spring and Fall 2005)

## OUTREACH

Durham University School Science Festival - Organizing activity on solar magnetism  
Peaks and Potentials - Taught summer student workshop series on solar physics  
MSU Astronomy Day - Organized solar physics exhibit  
Montana Science Olympiad - Designed state astronomy event  
Georgia Southern Planetarium - Created and presented planetarium show content
